

HARRINGTON

Process Solutions since 1959

TANKS & ACCESSORIES

- **SERVICE** *You depend on*
- **EXPERTISE** *You trust*
- **AVAILABILITY** *You need*

APPLICATIONS

- Water & Wastewater
- Aquatic Life Support
- Bio-Pharm & Life Science
- Microelectronics
- Chemical & Industrial
- Petrochemical
- Pools & Commercial Water
- Food & Beverage
- Breweries & Distilleries
- Metal Finishing

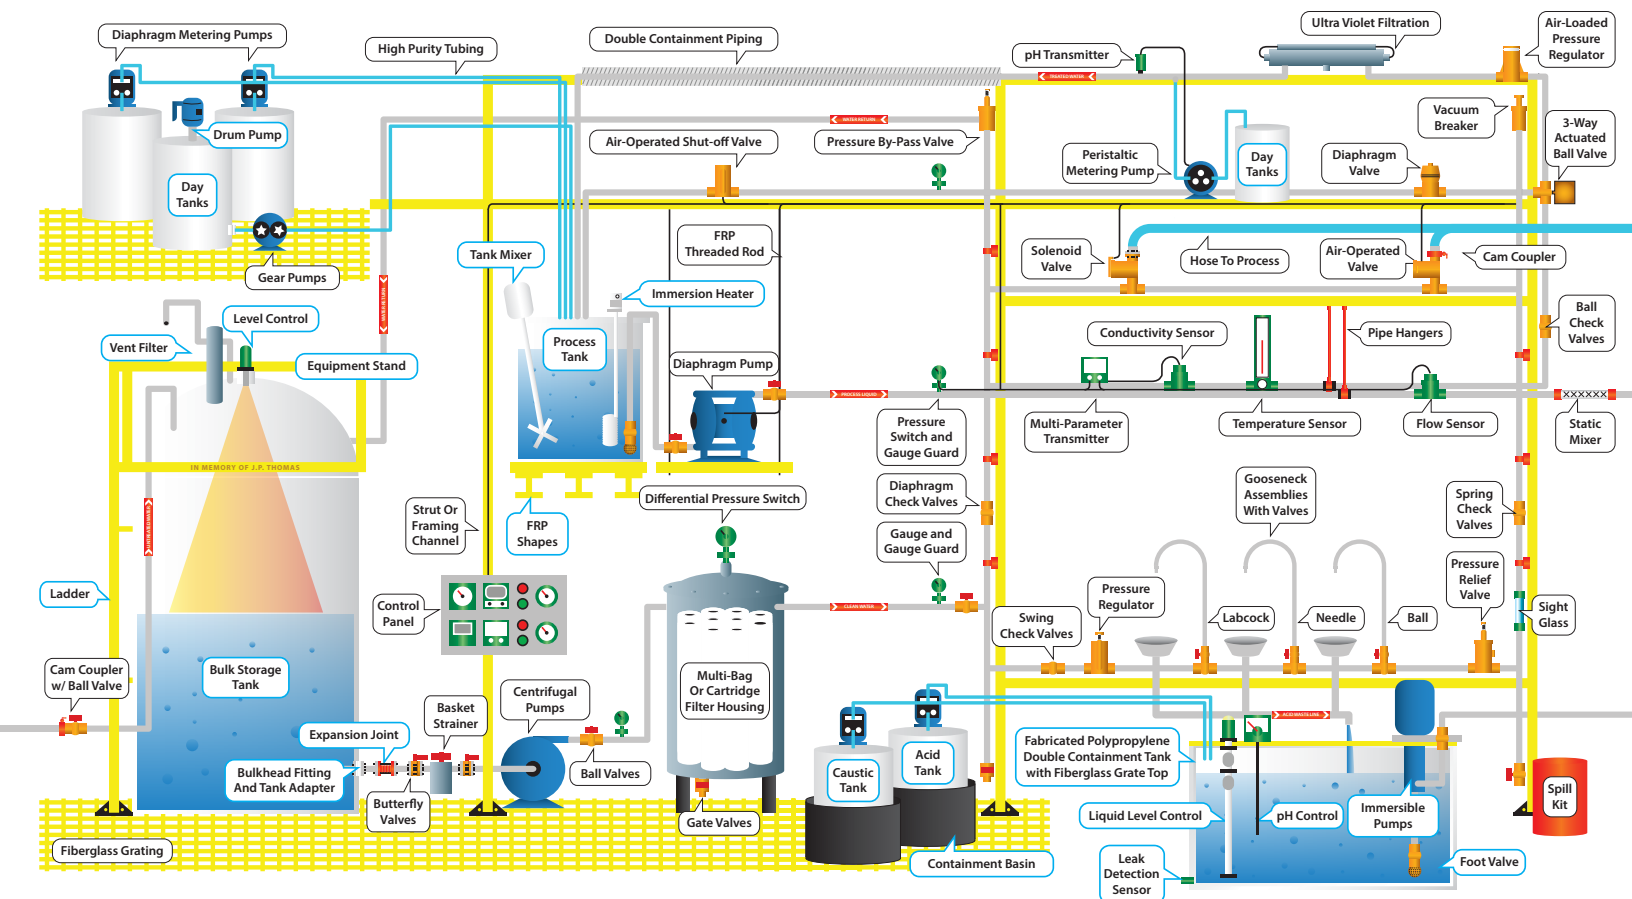

HARRINGTON supplies tanks for many industries including water treatment, chemical manufacturing, power generation, municipal waste treatment, and general industrial manufacturing. Harrington has provided tanks to handle hundreds of chemicals including Sodium Hypochlorite, Sulfuric Acid, Sodium Hydroxide, Hydrochloric Acid, Potassium Hydroxide and many others. Harrington provides tanks that are constructed to the latest industrial standards including ASTM, API, UL, NSF, ASME, and AWWA. Single and double wall construction, heating and cooling jackets. Harrington also provides mixers, platforms, ladders and a full range of accessory items.

Providing Industry Leading Tanks & Containment Systems

HARRINGTON
Process Solutions since 1959

AQUATIC LIFE SUPPORT

The Aquatic animal community is focused on the health and well-being of animals and also water quality. Which is why Harrington offers only the highest quality and most reliable products that are put into service in a life support system.

BIO-PHARM

In Pharmaceutical and Biotechnology industries, sterility and high purity are mandatory. Harrington offers the highest quality products in order to meet these high standards and specifications.

CHEMICAL

Chemical processing applications vary greatly, however one constant is the need for corrosion resistant products. Harrington offers the industry longer lasting, light-weight and corrosion resistant products to these applications.

POOLS

Harrington is dedicated to providing quality products and equipment for safe water treatment. Various recreation facilities, resorts and water parks rely on Harrington's products and services in order to maintain water quality.

FOOD & BEVERAGE PROCESSING

Harrington specializes in providing FDA and USDA-approved, easy-to-sanitize, corrosion resistant products and materials for the food and beverage processing industries.

INDUSTRIAL FLUID HANDLING

Regardless of your processing application, Harrington will keep your operations running smoothly, thanks to our extensive corrosion resistant piping system product offering.

COMMERCIAL WATER

Harrington provides piping systems and components for many commercial water applications including; schools, hotels, apartments, health care facilities, manufacturers and other higher volume water users needing high quality water.

LIFE SCIENCE

Life science applications demand durability, reliability, regulatory compliance, traceability from raw materials and design flexibility. Harrington provides product solutions for these very demanding applications.

METAL FINISHING

Harrington provides corrosion resistant piping systems, valves, actuators, and many other components ideally suited for use in many metal finishing applications.

PETROCHEMICAL

There are several chemical applications used throughout a plant. For example, Sodium Hypochlorite is used to control microbial growth and Sulfuric Acid is used to adjust pH. These chemical applications are perfect for Harrington's line of products.

PULP & PAPER

Corrosive environments like pulp and paper processing demand a durable, corrosion resistant solution. Harrington delivers FRP and thermoplastic products that won't rust, rot, warp or corrode.

MICROELECTRONICS

Microelectronics manufacturing requires the cleanest water possible and handles some of the most corrosive chemicals. Harrington understands your process needs and provides the most diverse product solutions for these unique fluid & gas handling applications.

WATER/WASTE WATER

Producing safe drinking water and treating waste water requires various chemicals that require the appropriate corrosion resistant products to handle these harsh applications. Harrington has the products required to keep these plants in safe operation.

BREWERIES & DISTILLERIES

Harrington offers a variety of solutions for the brewery, winery, and distillery markets. Whether you're a microbrew, vineyard or a large scale distillery, Harrington is your source for piping, filtration, bulk storage and all your other piping system needs.

CARBON STEEL TANKS

- Flat, Sloped, Dished, or Cone Bottoms
- Shop Built and Field Erected
- Vertical and Horizontal Configurations
- Single and Double Wall
- API, ASME, UL, and AWWA Standards
- Heating/Heat Transfer Systems
- Shop Applied Insulation
- Ladders, Platforms, Mixer Supports
- Unlimited capacities, configurations, and dimensions

FIBERGLASS TANKS

- Flat, Sloped, Dish, or Cone Bottom Configurations
- Vertical/Horizontal/Custom Fabricated
- Single and Double Wall
- All resins/corrosion barriers
- Ladders, Heat Systems, Insulation, Mixer Supports, Top Handrails and More
- Shop built to 50K+ Gallons
- Field Erected to 200K+ Gallons

CONTAINMENT TANKS

- Double Wall Tanks (ASTM D1998) & (NSF/ANSI 61)
- Used Oil Collection Tanks
- MCU™ Multiple Chemical Unit Tanks
- Containment Tanks & Basins
- Spill Containment Pallets and Pump Enclosures
- Chemical Feed Stations
- Chemical Injection Tank Systems
- HDPE, XLPE, PP, PVDF & FRP Materials available

STAINLESS STEEL TANKS

- Flat, Sloped, Dished, or Cone Bottoms
- Shop Built and Field Erected
- Vertical and Horizontal Configurations
- Single and Double Wall
- API, ASME, UL, and FDA Standards
- Heating/Heat Transfer Surfaces
- Shop Applied Insulation
- Industrial and Sanitary Finishes and Fittings
- Reactors and Pressure Vessels
- Mixers, including scrape surface agitators

POLYETHYLENE TANKS

- Flat or Cone Bottom
- Vertical/Horizontal/Custom Fabricated
- Single and Double Wall
- Linear & Cross Linked Resins
- Ladders, Heat Systems, Insulation, Fill Pipes and More
- Capacities 20 to 16500 Gallons

ACCESSORIES

- Vent Assemblies
- OSHA-Approved Ladders
- Seismic Restraints
- Leak Detection Systems
- Bolted and Threaded Manways
- Bolted and Sealed Lid Assemblies
- Quick Disconnect Couplings
- Bulkhead Fittings
- Sparging Eductors
- Tank & Drum Mixers
- Immersion Heaters
- Temperature Controls
- Transition Fittings
- Tank Stands
- Sight Gauges
- Steel Dolly's with Casters

FIELD ERECTED TANKS - BOLTED & WELDED

CARBON STEEL

- Any Diameter; Any Height
- Coated or Bare
- Glass-Fused to Steel
- Embedded Ring in Concrete
- Cone, Sloped or Flat Bottom
- Open Top or Cone Top

STAINLESS STEEL

- Any Diameter; Any Height
- T-304 or T-316
- Embedded Ring in Concrete
- Cone, Sloped or Flat Bottom
- Open Top or Cone Top

FIBERGLASS

- 16', 20', 25', 30' diameter
- Flat Bottom; Sloped Bottom
- Open Top; Domed Top
- Oblated Rings for shell sections (Efficient shipping costs)
- Prolated once on job-site

These are a few of our tank suppliers
